Ready for service

Menu   Info   Contacts

Please go outside.

Satphone antenna must have a clear view of the sky.
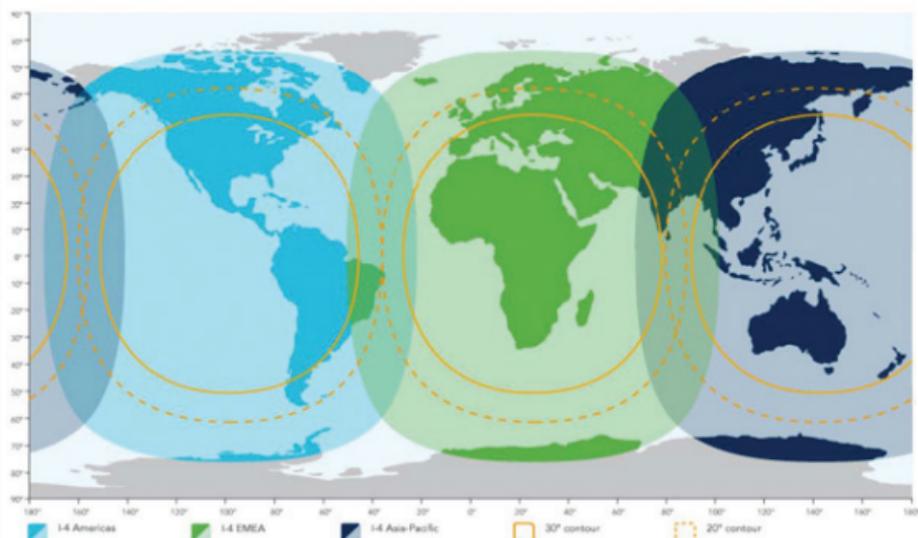

Power on satphone.

Press "Power/End" key.

Antenna must deployed (rotated up).
Rotate antenna 45 degrees to the top of the satphone.
Proper positioning is the "10 o'clock" or "2 o'clock" position.

**Wait for satphone to obtain a GPS fix and register.**
Initially, the display will indicate "searching satellite", followed
by "Acquiring GPS fix" with a bar graph showing GPS satellites
in view. Once a GPS fix is obtained, the display will indicate
"Registering with network". Once registered,
the display will indicate "Ready for service" and an ascending tone
will sound. If display indicates "Point antenna towards satellite"
point antenna to the center of the coverage circle you are
located in (see map below), and press "Search" (right soft key).

I-4 Americas   I-4 EMEA   I-4 Asia Pacific   30° contour   20° contour

IMPORTANT!
**The IsatPhone PRO WILL NOT WORK/place a call
without a new GPS fix,
registration and signal bars. Please be patient.**

Optimal signal strength is 3 bars or more, shown in the upper left
corner of the display.

Placing Calls FROM IsatPhone^PRO

Dial 00+Country Code+Area Code+Tel #
Check for adequate signal strength and registration.
Dial the sequence shown above
(The US Country Code is 1)
For a complete list of country codes, visit our website www.explorersatellite.com
When you have entered the digits, press the green "Send" key. Press the red Power/End key to "End" a call.
Note: Prepaid customers may dial *106#
for their account balances. This is a free call.

Placing Calls TO IsatPhone^PRO

Dial Int'l Dialing Code + Iridium Tel #
011 accesses an international line from the US. This code varies from country to country. Calls made to your satphone are billed to the party placing the call by their long distance carrier.

Placing Calls from IsatPhone^PRO TO IsatPhone^PRO

Dial 00 + IsatPhone^PRO 12 digit number
Calls to another IsatPhonePRO are billed at twice the rate. Calls to satphones operating on other satellite networks are much more expensive.

Sending Text Messages TO IsatPhone^PRO

Method 1 (preferred):
From the internet, go to: www.isatphonelive.com
Click "Send a free text message to an IsatPhone^PRO".
Enter the 12 digit IsatPhone^PRO telephone number.
Enter your email address or mobile number for replies.
Type in message up to 160 characters in the large box (character count includes your reply email/number).
Click "Send".
Your message will appear on the IsatPhone^PRO display the next time a call is placed. This feature is free and unlimited.
We strongly recommend using this feature for non-urgent communication.

Method 2:
An ordinary email may be sent to:
(12 digit IsatPhone^PRO #)@message.inmarsat.com
Character limit remains at 160.
Please omit email signatures if using this method.

Retrieving Text Messages

Press "Menu" (left soft key), highlight the messaging icon (upper left with a picture of an envelope) and press "select" (left soft key). Scroll to the desired folder and press the select key (center of navigation keys). Highlight the desired message and press the select key (center of navigation keys) to read message.
